01 PROFILE

Chartered Accountant with close to seven years of experience across business finance, FP&A and assurance, including post-articledship industrial training. Currently lead FP&A, management reporting, controllership and business partnering for a digital health group operating in India, the United States and Singapore, with a finance team of 8 to 10. Built the group's MIS, forecasting and profitability architecture, led the company side of a cross-border merger diligence, and rebuilt incentive governance. Assurance background at EY and GE HealthCare.

Seeking a Head of FP&A or Finance Director mandate with controllership, treasury and capital exposure, on a track to CFO.

02 SELECTED IMPACT

Led the company's road to profitability.

Diagnosed a revenue decline that the business read as a volume problem and proved it was margin per customer erosion, then separated sales monetisation from service retention as two distinct fixes. Quantified and tracked around Rs 2.5 Cr of monthly cost and margin actions across coaching, sales, marketing, people, vendors and incentives, each assigned to a named business head with a target and a KPI. Monthly EBITDA loss narrowed by close to 30 per cent across four months of actuals, with break-even budgeted in year.

Rebuilt incentive governance and stopped a recurring payout leakage.

Reviewed a full year of incentive payouts across sales and service teams and recommended more than twenty changes to scheme design, eligibility, approval and control. Built the payout model that implemented them and drove the changes through with Business and HR. Traced the recurring overspend to pharmacy pass-through revenue inflating the coach incentive base; excluded drug revenue from the base, capped payout as a percentage of net revenue, and introduced pre-payroll sign-off with a system lock until approval. Closed the leakage and tied payout to genuine team performance.

Ran the company side of a cross-border merger diligence.

Led the EY run financial due diligence workstream for a merger with a United States digital health business and built the India and pharmacy segments of the joint pro-forma operating model, covering revenue and cost builds, headcount synergies, allocation methodology, and reconciliation between transaction and management reporting.

Built the group's performance management system from zero.

Designed and automated the MIS: investor KPIs, a central key metrics data bank, consolidated and standalone P&Ls across India, the United States, pharmacy and e-commerce, actual versus budget reporting, payment gateway and refund analysis, and manpower cost analysis. Built revenue, contribution margin, indirect cost and EBITDA reconciliation checks into the pack, so every close is validated before it is released.

Designed the finance function, not only its output.

Built the operating model across six workstreams: operations and vendor management, inventory and pharmacy, revenue and receivables, payroll, controllership and compliance, and FP&A, each with maker checker ownership and documented book close and MIS close workflows. Specified and delivered the invoice engine with Product and Technology, replacing manual revenue capture.

Turned analysis into commitments other functions owned.

Partnered with Business, Marketing, HR and Technology heads to convert findings into agreed actions on headcount, marketing spend, vendor migration, pricing and accounting treatment, then tracked delivery monthly against KPIs. Supported the CFO on vendor negotiation and joint cost optimisation with the parent company.

03 EXPERIENCE

Manager, Business Finance and FP&A *HealthifyMe*

Mar 2024 to Present

Digital health group operating in India, the United States and Singapore. Own FP&A, management reporting, investor reporting, controllership support and business partnering. Lead a finance team of 8 to 10 across revenue and receivables, payroll, controllership and FP&A.

- **Planning:** Annual operating plan, long range plan, rolling monthly forecasts and a daily cash flow forecast.
- **Forecasting:** Driver based headcount, payroll and cost models across India and the United States, used to govern the hiring freeze and finance sign-off on every new role.
- **Commercial:** Unit economics, CAC and cohort analysis across four business units, with margin, contribution and revenue flow analysis and daily P&L tracking.
- **Controllership:** Day to day finance operations, payment and expense approvals, accounting policy design and revenue recognition treatment, and audit leadership from both the auditor and the auditee side.
- **Reporting:** Board and investor reporting packs, monthly business performance reviews, and diligence support for strategic transactions.
- **Team:** Allocate work, review output and coach a team of 8 to 10 across the revenue, payroll, controllership and FP&A workstreams.

Assistant Manager, Business Finance *BetterPlace*

Oct 2022 to Mar 2024

- **Consolidation:** Directed monthly MIS consolidation across seven group entities, turning fragmented entity reporting into a single executive view.
- **Reporting:** Collected and synthesised financial data from across departments into summary reporting for senior management.
- **Profitability:** Analysed business unit profitability and performance drivers and presented the findings to executive leadership.
- **Performance review:** Led the monthly business performance review process end to end, from data collection through to presentation.
- **Sales analysis:** Assessed sales team productivity and economics; the analysis informed incentive structuring and planning.

Executive, Assurance *EY (Ernst and Young)*

Feb 2021 to Oct 2022

- **Statutory audit:** Managed statutory audits for a high growth e-commerce client across multiple reporting areas.
- **Team leadership:** Led audit teams through control testing and substantive procedures under statutory deadlines.
- **Consolidation:** Contributed to consolidated financial statements covering more than twenty group companies.

CA Industrial Trainee, Finance *GE HealthCare*

Nov 2018 to Jan 2020

- **Planning:** Supported annual and quarterly budgeting and forecasting for the finance team.
- **Close:** Improved month end and quarter end close through journal entry preparation and cost reconciliation.
- **Business support:** Provided expenditure analysis to the marketing field team to support spend decisions.
- **Reporting:** Contributed to the financial performance reporting presented to the CFO.

- **Audit:** Conducted statutory, bank and tax audits for private limited companies.
- **Big Four support:** Provided audit support on assignments for a leading Big Four firm.
- **Compliance:** Managed income tax, GST and TDS filings within statutory timelines.
